

CHAKIRI SHANMUKHA SAI

Artificial Intelligence | Machine Learning | Intelligent Process Automation | B.Tech CSE 2025

shanmukhasaic@gmail.com | +91-7660805885 | LinkedIn: Chakiri Shanmukha Sai

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (2025) specializing in Artificial Intelligence and Intelligent Process Automation. Skilled in machine learning, deep learning, computer vision, NLP, and robotic process automation (RPA). Certified Google TensorFlow Developer with hands-on AWS cloud and full-stack web development experience. Seeking an entry-level role in AI, ML, Data Science, or Software Development.

EDUCATION

B.Tech — CSE (AI & Intelligent Process Automation) | KL University, Vijayawada 2021 – 2025
CGPA: 8.69 / 10.0

Bachelor of Business Management OL (Dual degree) | KL Business School 2022 – 2025
CGPA: 7.60

Class XII — Sri Sarada College, Andhra Pradesh 2019 – 2021

Class X (SSC) — N. St. Mathews Public School 2018 – 2019

TECHNICAL SKILLS

Programming: Python, Java, C

AI & ML: TensorFlow, Keras, Scikit-learn, CNN, Deep Learning, Computer Vision, NLP, OpenCV, NumPy, Pandas, Matplotlib

Web & Database: HTML5, CSS3, JavaScript, MySQL, REST APIs

Cloud & Tools: AWS (SageMaker, EC2), Git, GitHub, Jupyter Notebook, VS Code, Excel

Automation & RPA: Automation Anywhere, Bot Development, Process Automation, Intelligent Process Automation (IPA)

INTERNSHIP EXPERIENCE

AI/ML Virtual Intern Jan 2024 – Apr 2024
AICTE in collaboration with Amazon Web Services (AWS)

- Built and evaluated ML models for classification, regression, and clustering using Python, Scikit-learn, Pandas, and NumPy.
- Deployed AI/ML models on AWS Cloud (SageMaker, EC2); completed labs in neural networks, deep learning, and NLP.

Web Application Developer — Social Intern Jun 2023 – Aug 2023
Swecha Andhra Pradesh | Bridge the Digital Divide | KL University

- Built responsive web apps with HTML5, CSS3, JavaScript; developed backend REST APIs with Python/Java and MySQL database.
- Participated in agile team covering requirement analysis, testing, deployment, and maintenance.

PROJECTS

Movie Recommendation System | Python, Scikit-learn, Pandas, MySQL, HTML, CSS, JavaScript, Git

- Developed content-based and collaborative filtering engine using cosine similarity with full-stack frontend and MySQL backend.

Stress Detection via Facial Expressions | Python, OpenCV, TensorFlow, Keras, CNN, Haar Cascade, Dlib, NumPy

- Trained CNN model to classify stress levels from facial images and live video streams using Haar Cascade and Dlib face detection.

CERTIFICATIONS

- Google TensorFlow Developer Certificate** | Issued: Apr 2024 | Valid: Apr 2027 | ID: 100360737 | Verify
- AI & Machine Learning using Python — Level 2** (algorithms, NumPy, Pandas, Scikit-learn, model evaluation)
- Automation Anywhere Professional Certified Essentials** — RPA (bot creation, task automation, process optimization)
- Aviatrix Certified Engineer** — Multicloud Network Associate (AWS, Azure, GCP connectivity & security)

SOFT SKILLS

Team Collaboration | Analytical Thinking | Problem Solving | Communication | Time Management | Continuous Learning | Adaptability
