India

Profile Summary

I am a Computer Science and Cybersecurity undergraduate with a CGPA of 8.4, highly motivated and detail-oriented, eager to begin my career in a forward-thinking organization. With a strong foundation in programming and problem-solving, I am passionate about building innovative software solutions that address real-world challenges while contributing to organizational growth.

Beyond technical expertise, I am committed to continuous learning and professional development in the ever-evolving tech industry. My goal is to leverage my skills in software development and cybersecurity to create impactful, scalable solutions while growing as a professional in a collaborative and dynamic environment.

Areas of Impact

- Web Development
- Cybersecurity
- Continuous Learning
- Blockchain
- MERN full stack
- API development

Work Experience

Cybersecurity Internship, CISCO AICTE Virtual Internship Program
2023

MAY 2023 – SEPT

Completed a 2-month virtual internship focused on core cybersecurity concepts, tools, and practices.

- Network Security:** Gained hands-on experience with tools like **Wireshark** and **Nmap** for traffic analysis, vulnerability scanning, and threat detection.
- System Protection:** Learned techniques for securing operating systems, managing firewalls, and mitigating cyber threats.
- Ethical Hacking Basics:** Explored penetration testing methodologies and simulated attack-defense scenarios.
- Cloud & Security Integration:** Understood cloud security principles, data protection strategies, and compliance standards.
- Practical Labs & Projects:** Engaged in guided labs and real-world case studies to apply security practices in simulated environments.
- Collaboration & Learning:** Worked in a structured program with industry mentors, improving technical expertise and problem-solving skills.

Projects

- **Student Result or Grade Management System — Web Application:** Developed a Student Result or Grade Management System, with a front-end built using HTML, CSS and JavaScript for an intuitive user experience and interface. The back-end was implemented using PHP and MySQL to manage and store student data with security. The project was deployed on XAMPP server to simulate a local development environment, providing an efficient platform for student performance tracking. **Impact:** Delivered a scalable solution for managing student records, ensuring accuracy, speed, and data integrity.
- **Cryptocurrency Price Prediction Using Machine Learning:** Developed models such as Random Forest and Gradient Boosting in Python (Pandas, NumPy) using Google Colab and VS Code to predict Bitcoin prices based on historical price data, transaction volume, market cap, social media sentiment, and technical indicators. Integrated the trained model with Flask for real-time predictions via a web interface, improving accuracy in cryptocurrency trend forecasting and supporting data-driven financial decision-making. **Impact:** Improved accuracy of cryptocurrency trend forecasting, enabling data-driven decision-making and demonstrating practical deployment of ML models in financial prediction.
- **Body Mass Index calculator:** Designed and implemented a BMI calculator using React.js (frontend), Node.js and Express.js (backend), and MongoDB (database) for storing user health data. The application provides real-time BMI computation with an interactive UI, integrated state management, and form validation for accuracy. Development and testing were carried out using VS Code, Postman, and GitHub for version control. **Impact:** Delivered an intuitive health-tracking tool that simplifies BMI calculation, enhances user awareness of fitness, and demonstrates full-stack development and deployment skills.

Achievements

- **Juniper Network Certified Associate** certification, Junos
- **AWS Cloud Practitioner** certification, Amazon
- **Certified Associate Cloud Engineer** certification, Google
- **Cloud Infrastructure Certified Architect Associate** certification, Oracle
- **Automation Anywhere Certified Essentials** certificate, RPA

Skills

- **Programming Languages:** Java, Python
- **Web Frameworks & Libraries:** React.js, CSS
- **Backend Technologies:** Node.js
- **Databases:** MySQL, PostgreSQL, Mongo DB
- **Cloud Platforms:** AWS, GCP
- **Tools:** Git, Wireshark, NMap
- **Automation:** RPA Tools Expertise

Academics

Koneru Lakshmaiah Education Foundation, Guntur

Bachelor of Technology in Computer Science and Engineering (2021-2025)

Narayana Junior College, Amaravathi

Intermediate MPC (2019-2021)
